1、 Model

Name: UM0008-002

Model: FA01L02-UM0008-002Z

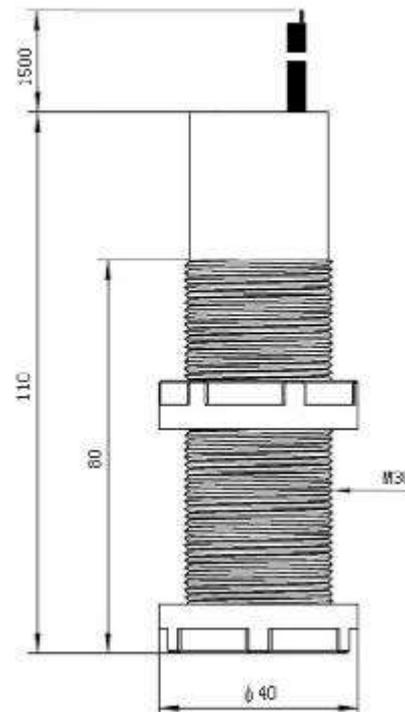

2、 Introduction

Using ultrasonic technology and incorporate design, the ultrasonic water level sensor detect the water level in a non-contact way, even slurry and other corrosive medium like waste water, hydrochloric acid and hydroxide could be detected. They can be applied to water supply and water disposal.

3、 Application

- ◆ **Water Supply and Water Disposal**
 - sluice and filtration Pool ;
- ◆ **Chemical and Medicine**
 - bank pot and material supply controlling system ;
- ◆ **Mining and Petroleum**
 - deposit ;
- ◆ **Food Manufacturing**
 - milk produce and alcohol produce, drink produce ;
- ◆ **Agriculture and Transportation**
 - irrigation system and goods transit controlling ;
- ◆ **Industry Automatization**
 - assembly-line controlling and object orientation

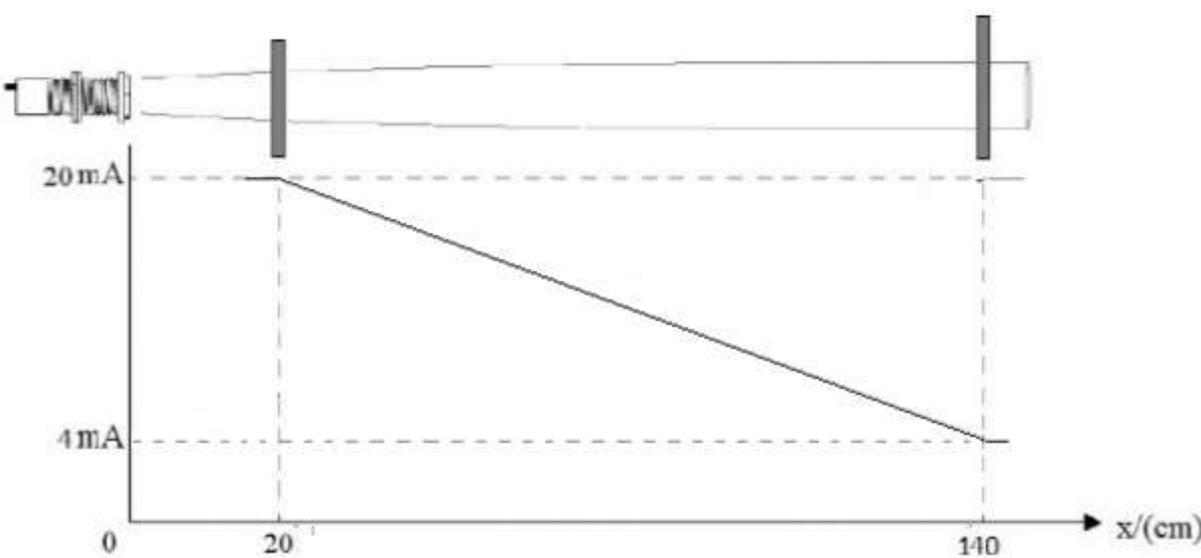

4、 Dimensions

5、Specification

Option	
Measuring Principle	Detect the distance by ultrasonic
Typical Application	Measure water level and object distance
Specification	
Frequency	40KHZ
Detect Range	20~140cm
Accuracy	±1cm
Display Accuracy	0.5cm
Response time	≥0.1s
Blind zone	20cm
Output	
Output current	20cm~140cm corresponding output 20~4mA
Rated operate condition	
Operation Enviornment	Indoor/outdoor
Condition temperature	-20℃~70℃
Relative Humidity	≤95%
Design	
Material	PVC
Length of cable	150±3cm
Power Supply	
Power	DC 24V
Current	≤20mA

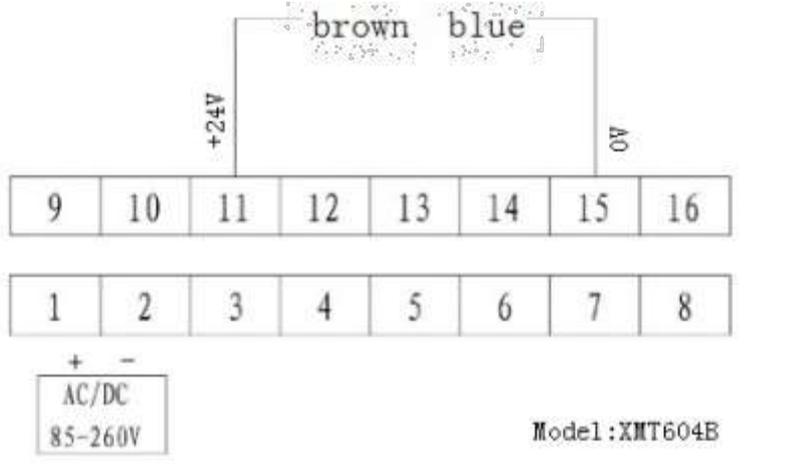

The curve of measuring distance and current:

6、Interface Control

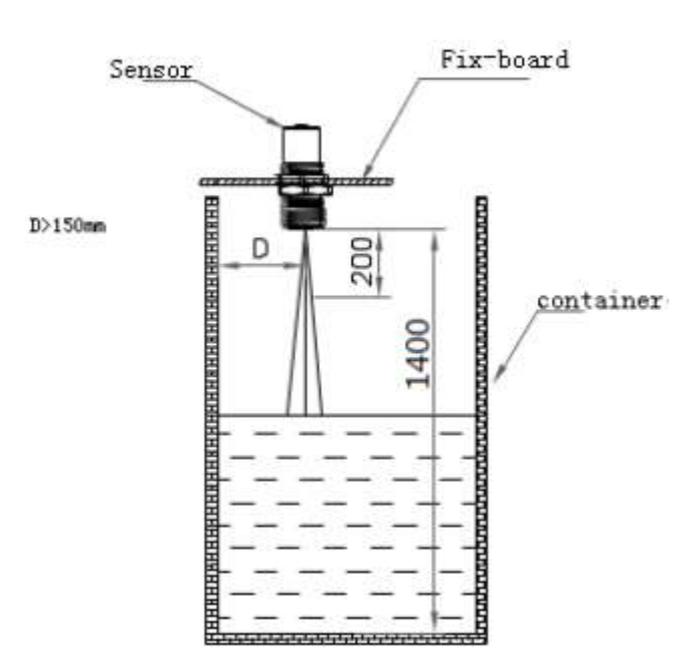

Colour	Function	Remark
blue	0V	- (4~20mA)
brown	DC +24V	+ (4~20mA)

example:

7、How to install

For liquid detection, installation as follows(Unit, mm)

广州市番禺奥迪威电子有限公司

Audiowell Electronics (Guangzhou) Co., Ltd.

地址: 中国广东省广州市番禺区迎宾路东升工业区 邮政编码: 511400
Add: Dongsheng Industrial Park, Yingbin Road, Panyu, Guangzhou 511400, China
Tel: +86-20-84802041 84802405 84871596 34516785 Fax: 84565207

8. Notice :

- 1、 The output current will be 20mA if wrongly tested;
- 2、 It is recommended to keep the open diameter of steel plate as 3.3cm-3.7cm when installation, and please make sure the rubber housing is assembled so as not cause resonance between sensor and steel plate, which may lead to failure of sensor.
- 3、 Ensure that the plane of sensor and the detect subject is at the same level. And keep it empty 20cm ahead of sensor and a circular radius of 15cm so as to avoid incorrect result.
- 4、 Normally, the time interval of data output is 250ms±100ms. But if it is tested in a complex environment or the liquid level changes suddenly, the time interval will be longer.
- 5、 Test is made under room temp., at the humidity of 50%. Deviation is possibly be caused if environment changes.
